

**A highlight  
for walls  
and corners**

**Cranjos**

# Create

*individual imprints*

# your own trend and form

**Cranjos** offers the alternative of wall or corner mounting. The fine sheet metal of the reflector shield offers the possibility of punching or imprinting various designs on the surface. So even your company's name or logo can be placed there. A variety of surface finishings is also available: lacquer coat, chromium plating or even a stone coating.

*coat of lacquer*

# Combine your colour and light

## Cranjos

is the new lighting system, suitable for every room environment and situation. The reflector shield is available in various sizes and finishings, according to customer's choice. Output, type and colour of the light source can also be selected by the customer. In this way it is possible to create improved lighting and environment arrangements.

The electric have been manufactured according to the state of the art. The reflector shield is manufactured from high-quality sheet metal and is attached by high-powered magnets to the mounting bracket. It can easily be removed for changing the light source, changing the lighting direction or just for cleaning.

The magnetic, heat resistant mounting of the reflector shield with the stable mounting bracket is the heart of **Cranjos**.

The variety of different colours and materials offer possibilities that, until now, have not been realizable and which interior architects could only dream about.

**Cranjos** creates a homogenous, dazzle-free lighting environment and can even be perceived as a decorative highlight.

# Cranjos

The **Cranjos** mounting bracket is the basis of our new lighting system. A well thought-out design, a stable construction and high flexibility provide innumerable installation possibilities. So nearly any creative and innovative idea can be successfully achieved in any environment.

## Mounting bracket
